IOSH Managing Safely

Introduction

This three-day safety training programme will give delegates the knowledge they need to help ensure safety in the workplace and prevent accidents. It is designed for managers and supervisors with responsibility for people or processes and will provide a basic, but broad and sound understanding of current health and safety requirements and principles.

This course is enhanced by integrating game based learning to embed knowledge and drive behavioural change.

Course Content

This assessed course will cover the application of recognised management principles in health and safety and will equip delegates to tackle issues in their own workplaces. Key topics include:

- Introducing managing safely
- Assessing risks
- Controlling risks
- Understanding responsibilities
- Understanding hazards
- Investigating incidents
- Measuring performance

Course Objectives

Delegates who complete the course should have a good understanding of these areas of Health & Safety and be able to answer the questions below.

- **Introducing managing safely**
  - Why is it important to manage safely
