

NEBOSH Environmental Awareness

Introduction

The NEBOSH Environmental Awareness at Work Qualification provides a useful introduction to environmental issues at work. It highlights the role workers can play in improving organisational environmental performance and will aid understanding of environmental impacts and risk control. It meets the training requirement for organisations implementing ISO 14001.

It is accessible to all. No prior knowledge is required and the content is relevant wherever you work around the world.

The qualification is an ideal first step towards progressing to the NEBOSH Certificate in Environmental Management, which provides a more extensive and practical understanding of environmental management in the workplace.

You will be assessed on your ability to apply your skills and knowledge to a wide range of issues and how to deliver positive change to a real workplace.

Course Objectives

- Basic environmental terms and their meaning
- Sources, impacts and controls of air, water, noise and land pollution
- Dealing with environmental emergencies
- Introducing environmental impact (risk) assessments
- Introduction to Environmental Management Systems

Course Outline

EAW 1: Environmental Awareness

Element 1 - Foundation of Environmental Awareness

Element 2 – Pollution, impact assessments & emergencies

Duration: 1 Day Course

Assessment: This course is assessed with a 30 minute multiple choice examination on a NEBOSH exam date to be arranged

Results are provided 15 days after the exam.
